

Feedback on the lecture on 'Drug addiction – Do you know enough'

The interactive lecture was conducted by Dr A.Venkedesh Babu

- The lecture was quite informative. Especially the part where he told us how easily people can buy these addictive drugs over the counter and this goes unchecked. As medical students we already knew about the side effects and addictive potentials of the drugs but he showed us the actual effect it has on the people and how it ruins one's life. Addiction is no longer a remote thing and the lecture was a real eye opener.

Aniket Gupta, intern

- Today's topic was a much 'need of the day' topic. The speaker put in commendable efforts to highlight the details of drug abuse and prescription abuse. The best part about the lecture were his personal experiences which added an extra touch in his insightful speech.

Jui Shah ,final MBBS student

- Today's elaborative discussion on drug abuse and addiction was really informative. Such awareness talks are small steps towards making a better youth, a better country. Sharing your life experiences with us showed us the dark side of today. Living in Gujarat, we have not been exposed to this dark side as much as for those living in North India. And I feel such healthy discussions on drug addiction is the need of hour. I, as a doctor and today's youth, promise to do my bit and educate people around me.

Dr Haiya Sheth ,resident doctor

- Thank you sir for such wonderful talk and sharing your experience with us. There are so many things that we learned today and as a doctors at least we will try to stop such kind of drug abuse cases amongs our circle or in hostels.

Dr Shreya Patel,resident doctor

- Today's lecture covered not only the pharmacological details of most recently abused drugs but also the social aspect of the same which we are facing. Many things which were not known to me were discussed. Had a great time

Parth thakkar ,final year MBBS student ,gold medalist

- It was totally motivating lecture. We acquired lot of information about different drugs used, how to protect one from this.. It was truly an extraordinary approach to create awareness in the society.. Great job !!Thank you very much Sir!!

AMC MET dental students

- Today's talk enlighten us about how young adults easily trap inside drug addiction through real -life incident, different types of drugs available and when they are used .how we can overcome addiction all these knowledge will not only benefit us as a health servant but also as responsible citizen Thanks a lot

AMC MET dental faculty

- "Thank you so much for spending your precious time for a talk on 'drugs and addiction ; do you know enough?' . We are very grateful, and also appreciate your efforts for betterment of the youth and society . The lecture was very informative and thought provoking. It will definitely help the audience to choose the right path and prevent them from taking wrong decisions. Thank you once again. "

Dr Karan Shah, Resident doctor

- His eagerness to teach and explain us and his generosity to solve our doubts was really very nice.. The way he simplified the topic and taught us... After the lec we all came to know so many new things and got aware about them The best part was he shared his experience and made the session lil humorous He also made us aware about what all is going on in the world in the present scenario Sir connected himself with the audience very nicely
- Thank you so much sir for this wonderful and eye opening lecture on drug abuse .The points you highlighted were on the mark and a crude reality .As drug abuse is more in medical students ,we as medical professionals now actually know our responsibility towards the society , especially towards the drug abused! And for that we will do our best to help the abused and prevent the others from this valley of death !
